Sharp & Earthy

Predicted quality 5.07/10 · Medium quality range · Standard (£10-£20)

PREDICTION SUMMARY

Metric	Predicted Result
Quality Score	5.07 / 10
Quality Range	Medium
Price Range	Standard (£10-£20)
Aroma Profile	Sharp & Earthy
Consumer Segment	Casual Drinkers

PHYSICOCHEMICAL PROPERTIES (LAB INPUT)

Property	Measured Value
Alcohol (% vol)	**9.4**
Chlorides (g/dm3)	**0.076**
Citric Acid (g/dm3)	**0**
Density (g/cm3)	**0.9978**
Fixed Acidity (g/dm3)	**7.4**
Free Sulfur Dioxide (mg/dm3)	**11**
pH	**3.51**
Residual Sugar (g/dm3)	**1.9**
Sulphates (g/dm3)	**0.56**
Total Sulfur Dioxide (mg/dm3)	**34**
Volatile Acidity (g/dm3)	**0.7**

FEATURE IMPACT ON PREDICTED QUALITY

Property	SHAP Value	Effect
Alcohol	-0.345	Decreases quality
Volatile Acidity	-0.243	Decreases quality
Free Sulfur Dioxide	-0.099	Decreases quality
Citric Acid	-0.057	Decreases quality
Total Sulfur Dioxide	+0.040	Increases quality
Chlorides	-0.027	Decreases quality
Density	-0.020	Decreases quality
pH	+0.007	Increases quality
Residual Sugar	-0.005	Decreases quality
Fixed Acidity	+0.003	Increases quality
Sulphates	+0.002	Increases quality

QUALITY IMPROVEMENT RECOMMENDATIONS

- Volatile acidity is high (0.70 g/dm³). Reduce below 0.60 g/dm³ to avoid a vinegar-like taste and improve quality.
- Alcohol content is on the lower side (9.4% vol). Wines in the 10.5-12.5% range tend to score higher for body and balance.
- Citric acid is low. A slight increase can add freshness and brighten the aroma profile.
